Client: Werhnerlab (self-reported, not independently verified)

Order number: ORD-2026-6701

Manufactured by: Werhnerlab

Samples: 1

Batch number: WS20-4483

Received: 2026-09-18

Report date: 2026-10-13

Method (identity & purity): Identity & purity not requested by client

SAMPLE IDENTIFICATION

Declared as	Sampling method	Physical form
Wolverine Stack 20mg	Sample provided by customer	Lyophilized powder, glass vial

ADDITIONAL SERVICES

Test	Method	Result	Acceptable range	Outcome
Sterility Testing	USP <71> methods	No growth observed	No growth	✓ Complies

RESEARCH COMMENT

A sealed glass vial containing a lyophilized powder matrix was received for a single microbiological safety assessment using sterility testing, strictly adhering to USP Pharmacopoeia guidelines <71>. At the sponsor's explicit instruction, analytical testing for chemical identification and purity profiling was omitted. The experimental protocol consisted of aseptic reconstitution and subsequent inoculation of the analyte onto selective culture media, maintained under standardized incubation parameters (duration and temperature) to monitor the proliferation of viable microbial load. The final microbiological assessment yielded a compliant result of "No growth observed," validating the absence of bacterial or fungal contamination in the sample analyzed under the specified operating parameters.

Convalence Labs performs independent testing only. We do not formulate, manufacture, or sell products, and hold no financial interest in the outcome of this analysis. Results refer to the tested sample only.
